|-------------------------|------------|--------|-------------------------|----------------|-----|
| C# | Javascript | Java | Artificial Intelligence | node.js | SQL |
| Machine Learning | AWS | Python | CSS | HTML | |

PROJECTS

Toronto - The 6

Developed an informational web project highlighting Toronto's culture, history, and global significance. Designed engaging content sections with dynamic visuals of landmarks such as the CN Tower and integrated responsive layouts to enhance user experience across devices.

National Geographic Website

Built an educational web platform showcasing global conservation areas and national parks. Integrated multimedia content, categorized regions (Africa, Asia, Americas, Oceania), and presented information from organizations like WWF, UNEP, and IUCN to create an interactive, knowledge-driven experience.

PORSCHE 911 GT3 RS SHOWCASE

Created a product-focused website highlighting specifications and features of the Porsche 911 GT3 RS. Implemented structured layouts for performance data, optimized high-resolution images, and designed a visually appealing interface that mirrors luxury automotive branding.

Real Estate Website

Designed and developed a personal real estate website to showcase property listings, market insights, and client resources. Included lead-generation features such as property detail pages, FAQs, and newsletter subscription to enhance client engagement and professional branding.

Portfolio Website

Developed a personal portfolio site to present skills, education, and projects as a Software Engineering Technology student. Focused on clean UI/UX, responsive design, and easy navigation while integrating downloadable resume functionality for recruiters and clients.
